

# 煤田地质与勘探

MEITIAN DIZHI YU KANTAN

2022 年第 1 期

(月刊 1973 年创刊)

第 50 卷 总 289 期

## 透明地质关键技术及示范 专题

### 目 次

#### ·特约来稿·

唐家会煤矿透明地质保障系统构建及示范 ..... 刘结高, 程建远, 疏义国, 刘再斌, 高银贵, 高耀全, 陆自清(1)

#### ·智能物探·

煤矿井下随掘地震震源特征及探测性能研究 ..... 王保利, 程建远, 金 丹, 杨小刚, 杨 辉(10)

钻孔瞬变电磁方法探测越界开采采空区的应用 .....  
..... 范 涛, 李 萍, 赵 兆, 李 巍, 赵 睿, 张 鹏, 姚伟华, 李宇腾, 房 哲(20)

厚煤层内小断层的反射槽波探测技术及应用 ..... 苏晓云(25)

回采工作面煤层动态标定预测技术应用研究 ..... 刘文明, 高耀全, 蒋必辞, 李 鹏, 薛悟强(31)

矿井电阻率法监测系统在采煤工作面水害防治中的应用 ..... 鲁晶津, 王冰纯, 李德山, 段建华(36)

煤层水平井中随钻电磁波仪器影响因素分析及电阻率模拟计算 ..... 陈 刚, 张冀冠, 李泉新, 刘志毅(45)

煤矿井下定向钻孔中电阻率探测技术与应用 ..... 李博凡, 刘 磊, 范 涛, 蒋齐平, 王 杰(52)

矿用钻孔超声流量自适应检测技术 ..... 代晨昱, 赵朋朋, 徐 晶(59)

#### ·智能钻探·

ZDY4500LFK 全自动钻机开发与应用 ..... 董洪波, 范 强, 李 坤, 马 斌(66)

ZDY25000LDK 智能化定向钻进装备关键技术研究 .....  
..... 方 鹏, 姚 克, 王龙鹏, 张 锐, 孟 瑞, 王 松, 邵俊杰, 刘 璞(72)

煤矿用自动化钻机远程监测系统研制 ..... 王天龙, 马 斌, 董洪波(80)

矿用随钻动态方位伽马仪器的研制与应用 ..... 陈 龙, 陈 刚, 张冀冠(86)

基于地震动态地质建模的地面防治水定向井优化 ..... 陆自清, 高耀全, 郭 媛(92)

基于透明地质的唐家会煤矿奥灰水防治技术 ..... 高耀全, 高银贵, 陆自清, 孔皖军(101)

#### ·三维地质建模·

煤矿巷道三维激光扫描关键技术及工程实践 ..... 王海军, 刘再斌, 雷晓荣, 韩保山, 陆自清(109)

基于微服务的地质保障系统架构与应用 ..... 李 鹏, 程建远(118)

基于钻孔雷达的透明工作面构建方法 ..... 蒋必辞, 程建远, 李 萍, 刘文明, 余俊辉, 吴国庆(128)

透明地质保障技术构建方法——以乌海矿区为例 ..... 谷保泽, 代振华, 李明星, 陈宝辉(136)

#### ·前沿探索·

元宇宙技术在煤矿安全培训和应急演练中的可行性研究 ..... 郭泱泱(144)

期刊基本参数: CN 61-1155/P\*1973\*m\*A4\*148\*zh\*P\* ¥ 40.00\*1500\*20\*2022-01 本期执行编辑: 范章群

## CONTENTS

|                                                                                                                                                      |                                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| Construction and demonstration of the transparent geological guarantee system in Tangjiahui Coal Mine .....                                          |                                            |
| ..... LIU Jiegao, CHENG Jianyuan, SHU Yiguo, LIU Zaibin, GAO Yingui, GAO Yaoquan, LU Ziqing(1)                                                       |                                            |
| Characteristics and detection performance of the source of seismic while excavating in underground coal mines .....                                  |                                            |
| ..... WANG Baoli, CHENG Jianyuan, JIN Dan, YANG Xiaogang, YANG Hui(10)                                                                               |                                            |
| Application of borehole transient electromagnetic method in detecting the cross-border mining goaf .....                                             |                                            |
| ..... FAN Tao, LI Ping, ZHAO Zhao, LI Wei, ZHAO Rui, ZHANG Peng, YAO Weihua, LI Yuteng, FANG Zhe(20)                                                 |                                            |
| Application of reflected in-seam wave detection for small faults in thick coal seams .....                                                           | SU Xiaoyun(25)                             |
| Application research on dynamic calibration and prediction technology of coal seam in coalmine working face .....                                    |                                            |
| ..... LIU Wenming, GAO Yaoquan, JIANG Bici, LI Peng, XUE Wuqiang(31)                                                                                 |                                            |
| Application of mine-used resistivity monitoring system in working face water disaster control .....                                                  |                                            |
| ..... LU Jingjin, WANG Bingchun, LI Deshan, DUAN Jianhua(36)                                                                                         |                                            |
| Influential factors of the electromagnetic wave instrument while drilling in coal seam horizontal wells and resistivity simulation calculation ..... |                                            |
| ..... CHEN Gang, ZHANG Jiguan, LI Quanxin, LIU Zhiyi(45)                                                                                             |                                            |
| Resistivity detection and its application in underground coal mine directional boreholes .....                                                       |                                            |
| ..... LI Bofan, LIU Lei, FAN Tao, JIANG Qiping, WANG Jie(52)                                                                                         |                                            |
| The adaptive detection technology of ultrasonic flow in mining boreholes .....                                                                       | DAI Chenyu, ZHAO Pengpeng, XU Jing(59)     |
| Development and application of ZDY4500LFK full automatic drilling rig .....                                                                          | DONG Hongbo, FAN Qiang, LI Kun, MA Bin(66) |
| Research on key technologies of the ZDY25000LDK intelligent directional drilling equipment .....                                                     |                                            |
| ..... FANG Peng, YAO Ke, WANG Longpeng, ZHANG Rui, MENG Rui, WANG Song, SHAO Junjie, LIU Pu(72)                                                      |                                            |
| Development of a remote monitoring system for coal mine automatic drilling rigs ...                                                                  | WANG Tianlong, MA Bin, DONG Hongbo(80)     |
| Development and application of a mine-used dynamic azimuth gamma instrument while drilling .....                                                     |                                            |
| ..... CHEN Long, CHEN Gang, ZHANG Jiguan(86)                                                                                                         |                                            |
| Optimization of surface directional wells for water control based on three-dimensional seismic dynamic geological modeling .....                     |                                            |
| ..... LU Ziqing, GAO Yaoquan, GUO Yuan(92)                                                                                                           |                                            |
| Prevention and control technology of Ordovician water in Tangjiahui Coal Mine based on transparent geology .....                                     |                                            |
| ..... GAO Yaoquan, GAO Yingui, LU Ziqing, KONG Wanjun(101)                                                                                           |                                            |
| Key technologies and engineering practice of 3D laser scanning in coal mine roadways .....                                                           |                                            |
| ..... WANG Haijun, LIU Zaibin, LEI Xiaorong, HAN Baoshan, LU Ziqing(109)                                                                             |                                            |
| Design and implementation of the geological guarantee system architecture based on microservices ...                                                 | LI Peng, CHENG Jianyuan(118)               |
| Construction method of transparent working face based on borehole radar .....                                                                        |                                            |
| ..... JIANG Bici, CHENG Jianyuan, LI Ping, LIU Wenming, YU Junhui, WU Guoqing(128)                                                                   |                                            |
| Construction method on transparent geological guarantee technologies: A case study of Wuhai Mining Area .....                                        |                                            |
| ..... GU Baoze, DAI Zhenhua, LI Mingxing, CHEN Baohui(136)                                                                                           |                                            |
| Feasibility study of the Metaverse technology in coal mine emergency training and drills .....                                                       | GUO Yangyang(144)                          |
